EDUCATION

University of Florida | Gainesville, FL

Expected December 2027

Bachelor of Science in Computer Science, Minor in Engineering Innovation

GPA: 3.98/4.0

SKILLS

Languages: JavaScript, TypeScript, Python, Go, C#, C++, SQL, HTML/CSS

Frameworks: Node.js, Next.js, React.js, Pandas, NumPy, .NET

Tools: Linux/Bash, Git, Github, Github Actions, Docker, AWS, Cloudflare, Vercel, Figma, PostgreSQL, MongoDB, Microsoft SQL Server, Postman, Firebase, Jira, Microsoft PowerBI

EXPERIENCE

Collins Aerospace (RTX)

Melbourne, FL

Software Engineer Co-Op - Factory Enablement & Support

January 2026 – August 2026

- Optimized Python data-processing workflows for **100,000+** production records, reducing processing time by **80%** and storage usage by **60%** through data-processing and algorithmic improvements.
- Engineered a React-based troubleshooting interface using historical production data, reducing diagnosis time for failed units by **3+** hours per week across multiple production sites.
- Developed and deployed C# (WPF) desktop applications via ClickOnce, integrating Microsoft SQL Server to manage Smart Torque users and software-version assignments for **500+** production operators, streamlining software testing and administration.

SwampHacks, University of Florida

Gainesville, FL

Technical Developer (SwampHacks XI)

May 2025 – March 2026

- Developed a hackathon management platform using React, TypeScript, Go, and PostgreSQL, supporting event operations, applications management and **2,000+** registered users.
- Designed and implemented a dynamic application system that processed **1,100+ applications**, enabling organizers to customize forms without code changes.

Technology Executive (SwampHacks XII)

March 2026 – Present

- Lead a team of **7** developers building and maintaining SwampHacks' technology platform, overseeing project planning, code reviews, and development across the hacker portal, website, check-in system, and Discord bot.
- Architect and maintain the CI/CD and deployment infrastructure with **GitHub Actions**, **Docker**, and **Digital Ocean**, automating releases and ensuring 24/7 uptime for the platform.

Prevatt Research Group, University of Florida

Gainesville, FL

Undergraduate Researcher

August 2024 – Present

- Engineered a machine learning pipeline using **PyTorch** and **Numpy** to classify roof types of buildings using **3,000+** aerial images from Google Maps API for hurricane damage assessment studies, achieving up to **80%** prediction accuracy.

SOFTWARE PROJECTS

GitFlow | [Devpost](#) | React, FastAPI, Express.js, Docker

September 2025

- 1st place winner** and “Most Creative” project at ShellHacks 2025 for engineering a tool that enables developers to explore the structure of a Github repository with zero set up.
- Developed deployment workflow with Express API endpoints and pipelines aligned with microservices principles; integrated ElevenLabs AI voice summaries for real-time code reviews and insights.

Online Chess Platform | [Github](#) | Rust, React, Typescript, Websockets, Nginx

May 2023

- Built a full-stack chess platform with real-time multiplayer gameplay using React, WebSockets, and a Rust-based chess engine.
- Deployed to a DigitalOcean VPS with Nginx, gaining hands-on experience with DevOps and deployment practices.
